

AUSTRALIAN NATIONAL KENNEL COUNCIL LTD POLICY STATEMENT

MICRO CHIPPING

Adopted
October 2013

In accordance with ANKC Ltd Regulations Part 6, Clause 5.3 all ANKC Ltd puppies are required to be micro chipped before registration. Micro chipping is a means of permanent positive identification.

Puppies are usually micro chipped at around 6-8 weeks, with the microchip being placed under the skin between the shoulder blades.

It is the responsibility of the breeder to ensure that the microchip details of the puppy are recorded on a recognised Registry within Australia.
